

John D. Soltis

Johns Hopkins University - Department of Physics & Astronomy

Bloomberg Center for Physics and Astronomy

3400 N. Charles Street, Baltimore, MD 21218

<https://johnsoltis.github.io/>

<https://orcid.org/0000-0002-0104-3593> | <https://github.com/johnsoltis>

EDUCATION:

Johns Hopkins University	2019 - 05/2025 (expected)	Baltimore, MD
Krieger School of Arts & Sciences		
M.A. in Physics (2023)		
Ph.D in Astronomy and Astrophysics		
University of Michigan	2014 - 2018	Ann Arbor, MI
Honors Program, College of Literature, Science, and the Arts		
B.S. in Physics and Mathematical Physics		

PROFESSIONAL INTERESTS:

Observational Cosmology, Artificial Intelligence, Science Policy, Data Science

SKILLS:

Python, Pytorch, Tensorflow, Science Communication, Policy Advocacy

RESEARCH PROJECTS & TEACHING:

Deep Learning Applications in Galaxy Cluster Cosmology	2021 - Present
<i>Johns Hopkins University & Space Telescope Science Institute</i>	
<i>Advisor: Michelle Ntampaka</i>	
Designed, trained, and tested artificial intelligence models to characterize galaxy cluster mass accretion rates and improve X-ray observations. Developed novel interpretability methods to enable physical discovery.	
Robustness of Cosmological Simulations	2023 - 2024
<i>Center for Computational Astrophysics, Flatiron Institute</i>	
<i>Advisor: Lehman Garrison</i>	
Investigated the robustness of dark matter halo mass accretion rates in cosmological simulations.	
Tip of Red Giant Branch Calibration	2019 - 2020
<i>Johns Hopkins University & Space Telescope Science Institute</i>	
<i>Advisor: Adam Riess</i>	
Measured the Hubble constant using updated position data of Milky Way stars. Experimented with hierarchical Bayesian models, Hamiltonian Monte Carlo, and kernel density estimation.	

Machine Learning Applications in Wildfire Detection

2018 - 2019

*Lawrence Berkeley National Laboratory**Advisor: Carl Pennypacker*

Used images from wildfire detection cameras in California and Nevada to train a convolutional neural network to detect wildfires early.

Testing Statistical Isotropy with Type Ia Supernovae

2017 - 2018

*University of Michigan**Advisor: Dragan Huterer*

Implemented a novel and robust test of statistical isotropy in the Universe using type Ia supernovae residuals.

Learning Assistant in Introductory Physics

2018

*University of Michigan**Advisors: Timothy McKay & Yuri Popov*

Answered students' questions in class and in office hours for the introductory physics course.

Simulation of Laser-Driven Plasma Instabilities

2015 - 2016

*University of Michigan**Advisor: Matthew Trantham*

Simulated laser-driven plasma instabilities with a variety of experimental conditions. Results were used to improve experimental design.

Summer Scholar Internship Program

2015

*Lawrence Livermore National Laboratory**Advisors: John Heebner & Jason Chou*

Improved the accuracy of laser waveform generation in order to aid experiments at the National Ignition Facility.

PROFESSIONAL DEVELOPMENT:**Johns Hopkins University Mentorship Program**

2023 - Present

Mentor to graduate student and undergraduate student. Advised mentees on networking, career paths, and professional opportunities.

Space Telescope Science Institute Liaison

2024 - Present

Serving as contact point between students in my department and Space Telescope. Organizing lunches for students and colloquium speakers.

Union Steward

2024 - Present

Serving as an advocate for my peers on workplace issues.

American Astronomical Society

2024

Met with Members of Congress and their staffs to advocate for increased NASA and NSF funding at Congressional Visit Day.

Institute of Electrical and Electronics Engineers	2024
Advocated for NSF funding and improved STEM workforce policies at Congressional Visit Day.	
Johns Hopkins Science Policy & Diplomacy Group	2024
Advocated for the Keep STEM Talent Act of 2023 during Congressional Visit Day. Co-authored memo on immigration reform for those with advanced STEM-degrees.	
Graduate Representative Organization	2021 - 2023
Represented my department on issues like travel grants and campus security.	
Maryland Space Grant Consortium Observatory Fellow	2021 - 2022
Hosted open house events, trained perspective observers, and helped run the MDSGC symposium.	
Public Forum Debate Judge	2020 - 2022
Judged for Michigan Interscholastic Forensics Association Public Forum League	
Michigan Journal of International Affairs	2014 - 2016
Writer for the Asia Region	
Brother Rice Debate Team	2010 - 2014
Varsity in Public Forum Debate	

SELECTED TALKS AND POSTERS:

1. *Direct Estimation of Galaxy Cluster Mass Accretion Rates using Machine Learning*. Galaxy Cluster Group Meeting, Center for Astrophysics, Harvard-Smithsonian. October 22nd, 2024.
2. *Direct Estimation of Galaxy Cluster Mass Accretion Rates using Machine Learning*. Yale Data Science X Astronomy - Astrophysics Seminar, Yale University. September 17th, 2024.
3. *Estimating Galaxy Cluster Mass Accretion Rates from Observations using Machine Learning*. 2024 AstroAI Workshop, Center for Astrophysics, Harvard-Smithsonian. June 17-21, 2024.
4. *Galaxy Cluster Dynamical State, Follow-Up Observations, and Machine Learning*. Machine Learning Seminar, Argelander Institute for Astronomy, Bonn. June 6th, 2024.
5. *Galaxy Cluster Mass Accretion History*. 6th Neighborhood Workshop, Pennsylvania State University. April 25th, 2024.
6. *Testing the Robustness of Mass Accretion Histories in Scale-Free Simulations*. Merging Clusters Workshop, Yonsei University. December 21st, 2023.
7. **J. Soltis**, M. Ntampaka. "Predicting Follow-Up Observations of Galaxy Clusters Using Machine Learning", American Astronomical Society Meeting #240, id. 139.19. *Bulletin of the American Astronomical Society*, Vol. 54, No. 6 e-id 2022n6i139p19 (2022)

PUBLICATIONS:

1. **J. Soltis**, M. Ntampaka, B. Diemer, J. ZuHone. “Estimating Galaxy Cluster Mass Accretion History from Multiwavelength Observations using Machine Learning”, *prepared for submission and under internal collaboration review*
